Speak - English, Igbo

OBJECTIVE

As a junior software developer, I seek challenging opportunities and roles to enhance my professional skills, capabilities and knowledge in an organization which recognizes the value of hard work and trusts me with responsibilities and challenges.

EXPERIENCE

October 2021 - January 2022

Upperlink Ltd.
Software Developer Intern

Collaborated with a cross-functional team of 5 interns (including a project manager) on a game review website.

Trained new interns in HTML/CSS.

Applied NodeJs, mongoose ORM skills in the back end development of a job recruitment web application.

EDUCATION

2017 - 2022

Nnamdi Azikiwe University
Electronic & Computer Engineering

PROJECTS

School Management Application
A website where students can check their term results after logging in with an admin section for adding staff and student profiles.

Attendance System
Designed a software and prototype using Proteus and Arduino programming;
This system increases count of students in attendance when the correct student IDs are entered and also detects if an ID is incorrect and if it has been previously entered.

Weather Application
A web application built with python-flask and ReactJs which uses the openweather-api to show weather forecast.
It also enables user subscription to the service.
